Advancing Patient Safety ~

Sutter East Bay Medical Foundation and our Sutter Health network are raising the bar on patient safety. We are the first network on the West Coast to use early warning software as well as advanced video and electronic monitoring to allow physician specialists to keep an even closer eye on critically ill patients 24 hours a day, seven days a week. We continue to be a pioneer in using bar-coding and expert databases to track medication orders to help prevent errors. To further improve clinical outcomes, enhance patient safety and reduce the cost of high-quality care, Sutter Health also is investing \$450 million to deploy an electronic health record (EHR) system as well as \$1.2 billion in a broad range of patient safety initiatives over the next 10 years.

About Sutter Health ~
